

Conduct research that makes a difference!

Are you passionate about conservation and eager to contribute to the understanding and preservation of natural landscapes?

Peninsula State Park, a natural gem of Wisconsin, invites you to be part of its ongoing story. Through the *Friends of Peninsula State Park's* Research Grant program, **your research can directly contribute to the park's sustainability and future!**

Nestled along the picturesque shores of Green Bay, Peninsula State Park is renowned for its stunning landscapes, rich biodiversity, and extensive recreational opportunities. Spanning over 3,700 acres, this park boasts lush forests, pristine shorelines, and captivating vistas that attract visitors and researchers alike.

Interested parties are encouraged to apply for grants that fund Park improvement studies designed to support sustainability of our natural resources. Friends of Peninsula State Park are particularly interested in applicants who will study:

- **Combating invasive species:** Identify and manage threats to the park's delicate ecosystem.
- **Understanding the Niagara Escarpment:** Uncover the unique ecological significance of this geological wonder.
- **Optimizing trail use:** Ensure safe and enjoyable experiences for all park visitors, year-round.
- **Enhancing campground management:** Improve visitor satisfaction while protecting the natural environment.

These topics are examples and other topics are still welcome and will be given full consideration.

Applications may be submitted year-round and are reviewed and approved quarterly. Typical grant budgets range from \$1,000 to \$2,000, however larger budgets will be considered.

Become a part of Peninsula State Park's legacy. Visit Friends of Peninsula State Park website: <https://peninsulastatepark.org/research/> to submit your research proposal today! For more information, contact the Friends at info@peninsulastatepark.org.

Together, we can ensure Peninsula State Park thrives for generations to come.
